Configuración Gmail

Configuración Gmail

- La implementación del envío de email se realizará por medio de una cuenta de gmail.
- Se debe acceder por medio de un password de aplicación en lugar del password del email.
- En la siguiente liga se detalla como crear un password de aplicaciones:
<https://support.google.com/accounts/answer/185833?hl=es>
- Acceder a la siguiente liga: <https://myaccount.google.com/>

Configuración Gmail

Crear y utilizar contraseñas de aplicación

Importante: Para crear una contraseña de aplicación, debes habilitar la verificación en dos pasos en tu cuenta de Google.

Si utilizas la verificación en dos pasos y aparece el error "Contraseña incorrecta" al iniciar sesión, puedes intentar utilizar una contraseña de aplicación.

1. Ve a tu [cuenta de Google](#) .
2. Selecciona **Seguridad**.
3. En "Iniciar sesión en Google", selecciona **Verificación en dos pasos**.
4. En la parte inferior de la página, selecciona **Contraseñas de aplicación**.
5. Introduce un nombre que te ayude a recordar dónde vas a utilizar la contraseña de aplicación.
6. Selecciona **Generar**.
7. Para introducir la contraseña de aplicación, sigue las instrucciones que aparecen en pantalla. La contraseña de aplicación es el código de 16 caracteres que se genera en tu dispositivo.
8. Selecciona **Listo**.

How you sign in to Google

Make sure you can always access your Google Account by keeping this information up to date

- 2-Step Verification** >
- Passkeys Start using passkeys >

Configuración Gmail

← 2-Step Verification

These printable one-time passcodes allow you to sign in when away from your phone, like when you're traveling.

Authenticator app

Use the Authenticator app to get verification codes at no charge, even when your phone is offline. Available for Android and iPhone.

Security Key

A security key is a verification method that allows you to securely sign in. These can be built in to your phone, use Bluetooth, or plug directly into your computer's USB port.

Devices that don't need a second step

You can skip the second step on devices you trust, such as your own computer.

Devices you trust

Revoke trusted status from your devices that skip 2-Step Verification.

[REVOKE ALL](#)

App passwords

App Passwords aren't recommended and are unnecessary in most cases. To help keep your account secure, use "Sign in with Google" to connect apps to your Google Account.

App passwords

1 password

Configuración Gmail

← App passwords

App passwords let you sign in to your Google Account from apps on devices that don't support 2-Step Verification. You'll only need to enter it once so you don't need to remember it. [Learn more](#)

You don't have any app passwords.

Select the app and device you want to generate the app password for.

Your app password for Windows Computer

wubp zpok gmxu ksok

How to use it

1. Open the "Mail" app.
2. Open the "Settings" menu.
3. Select "Accounts" and then select your Google Account.
4. Replace your password with the 16-character password shown above.

Just like your normal password, this app password grants complete access to your Google Account. You won't need to remember it, so don't write it down or share it with anyone.
